## OnSSI and Lextech Labs Announce Mobile Solution For Video Management and Control

*Integrates OnSSI's Video Management Software with iRa C3*

*Mobile Video Surveillance Application*

Pearl River, NY (February 1, 2011) - OnSSI has announced that their flagship video management platform, Ocularis has passed Lextech Lab's compatibility testing. As a result, Lextech's iRa C3 mobile video surveillance application will support OnSSI's software and meet the mobile viewing requirements of the security and law enforcement industry.

"The successful integration of iRa C3 further extends OnSSI's user base," said Mulli Diamant, Vice President of Sales, OnSSI. "In addition to the obvious benefits of heightened situational awareness, being able to use a video surveillance system in

conjunction with today's most widely used mobile devices capitalizes on a user's investments in IP-based systems."

Using Lextech Lab's mobile video surveillance application iRa C3, users can access and control multiple video feeds, as well as view recorded video in a split screen format on an iPad, iPhone, iPod Touch or Blackberry mobile device. The application works by allowing the iRa C3 to log in to the OnSSI system for quick and portable viewing and control of cameras located anywhere on the network.

"Pairing the functionality of OnSSI's platform with iRa C3's intuitive mobile video interface broadens the value of an OnSSI investment by extending back room systems into the hands of a new user. Not only do those new users now have access to critical video anytime, anywhere, they are also inventing ways to use the video," said Alex Bratton, Founder & CEO of Lextech Labs.

OnSSI's Ocularis IP Video Management solution is an open-architecture, non-proprietary, software platform that allows viewing, management and recording of video from an unlimited number of IP and non-IP video surveillance cameras. Ocularis also allows for video storage management and can correlate and fuse video and non-video events and alerts resulting in automatic video delivery to subscribers of interest.

**For more information on OnSSI, call 845-732-7900, e-mail [info@onssi.com](mailto:info@onssi.com) or visit [www.onssi.com](http://www.onssi.com).**

### **About OnSSI**

With tens of thousands of installations around the world and more citywide deployments than any other video surveillance software solution, OnSSI is the choice of security and IT professionals. OnSSI's solutions fit needs of all sizes and enable users to choose best-of-breed components, grow with their needs over time and increase productivity and efficiency in order to help security professionals keep their facilities safer more easily.

### **About Lextech Labs**

Lextech Labs is a provider of mobile solutions allowing video to be instantly delivered to mobile devices. The company was a winner in the Best New Technology Product of the

Year category of the 2010 Edison Awards and won the 2010 Chicago Innovation Award. Lextech Labs' products include the C3 application for Apple and Blackberry platforms and computer web browsers. The company's customers include federal agencies, law enforcement, universities and convention centers.
